- Check out the README.md file and the issues!
- Keyword at the end of the talk
- URL for submitting the report at the end of the talk

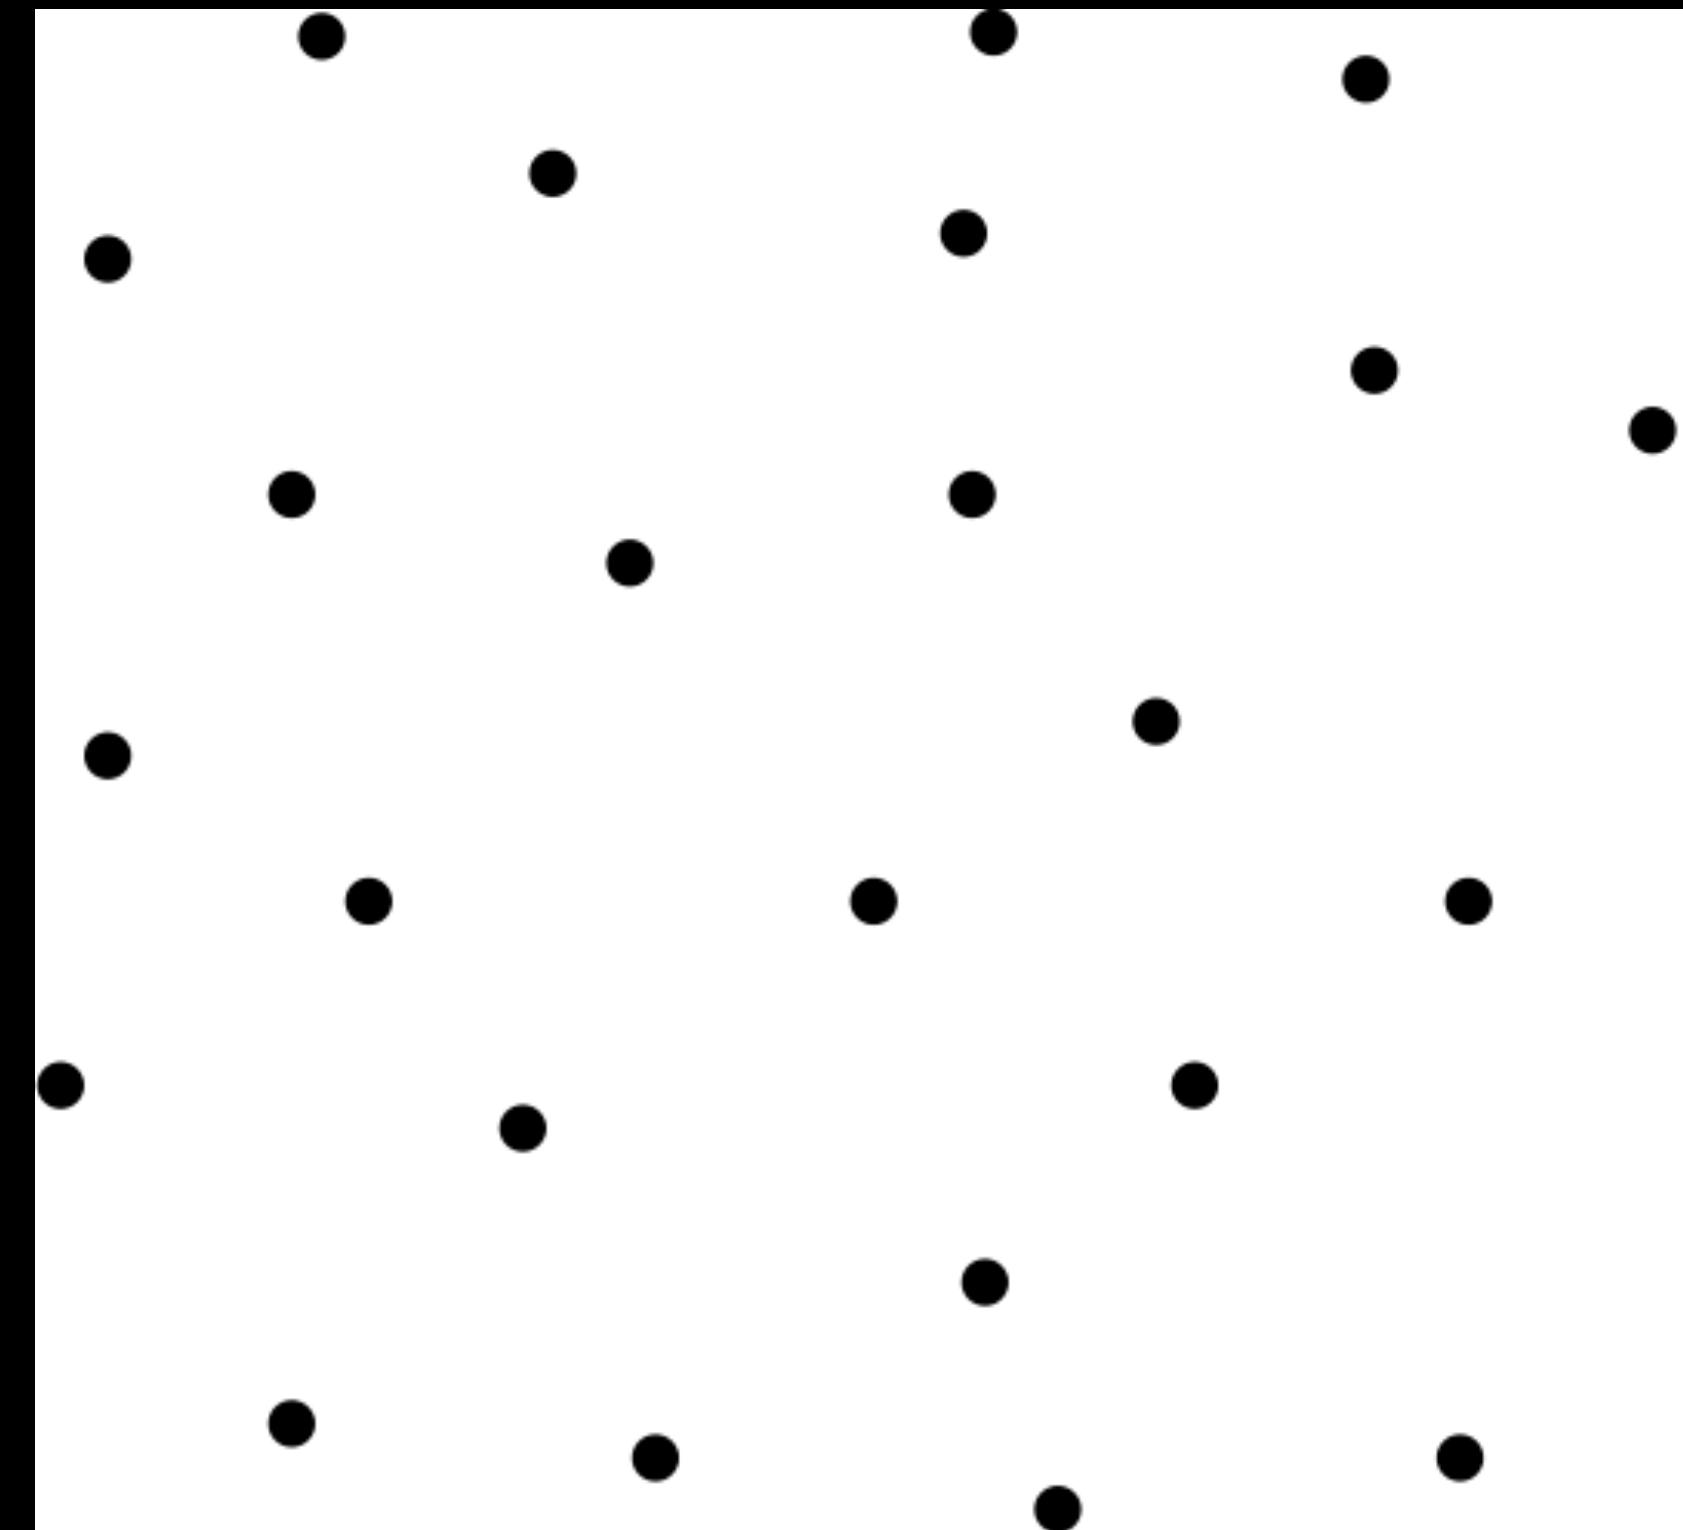

Topic of this video:  
Centralized communication

# Communication: sharing a medium

- Sharing a physical link between two or multiple parties
- *The physical layer*
- A medium could be: electric wires, optic fibers, radio airwaves, sound, flying birds like pigeons

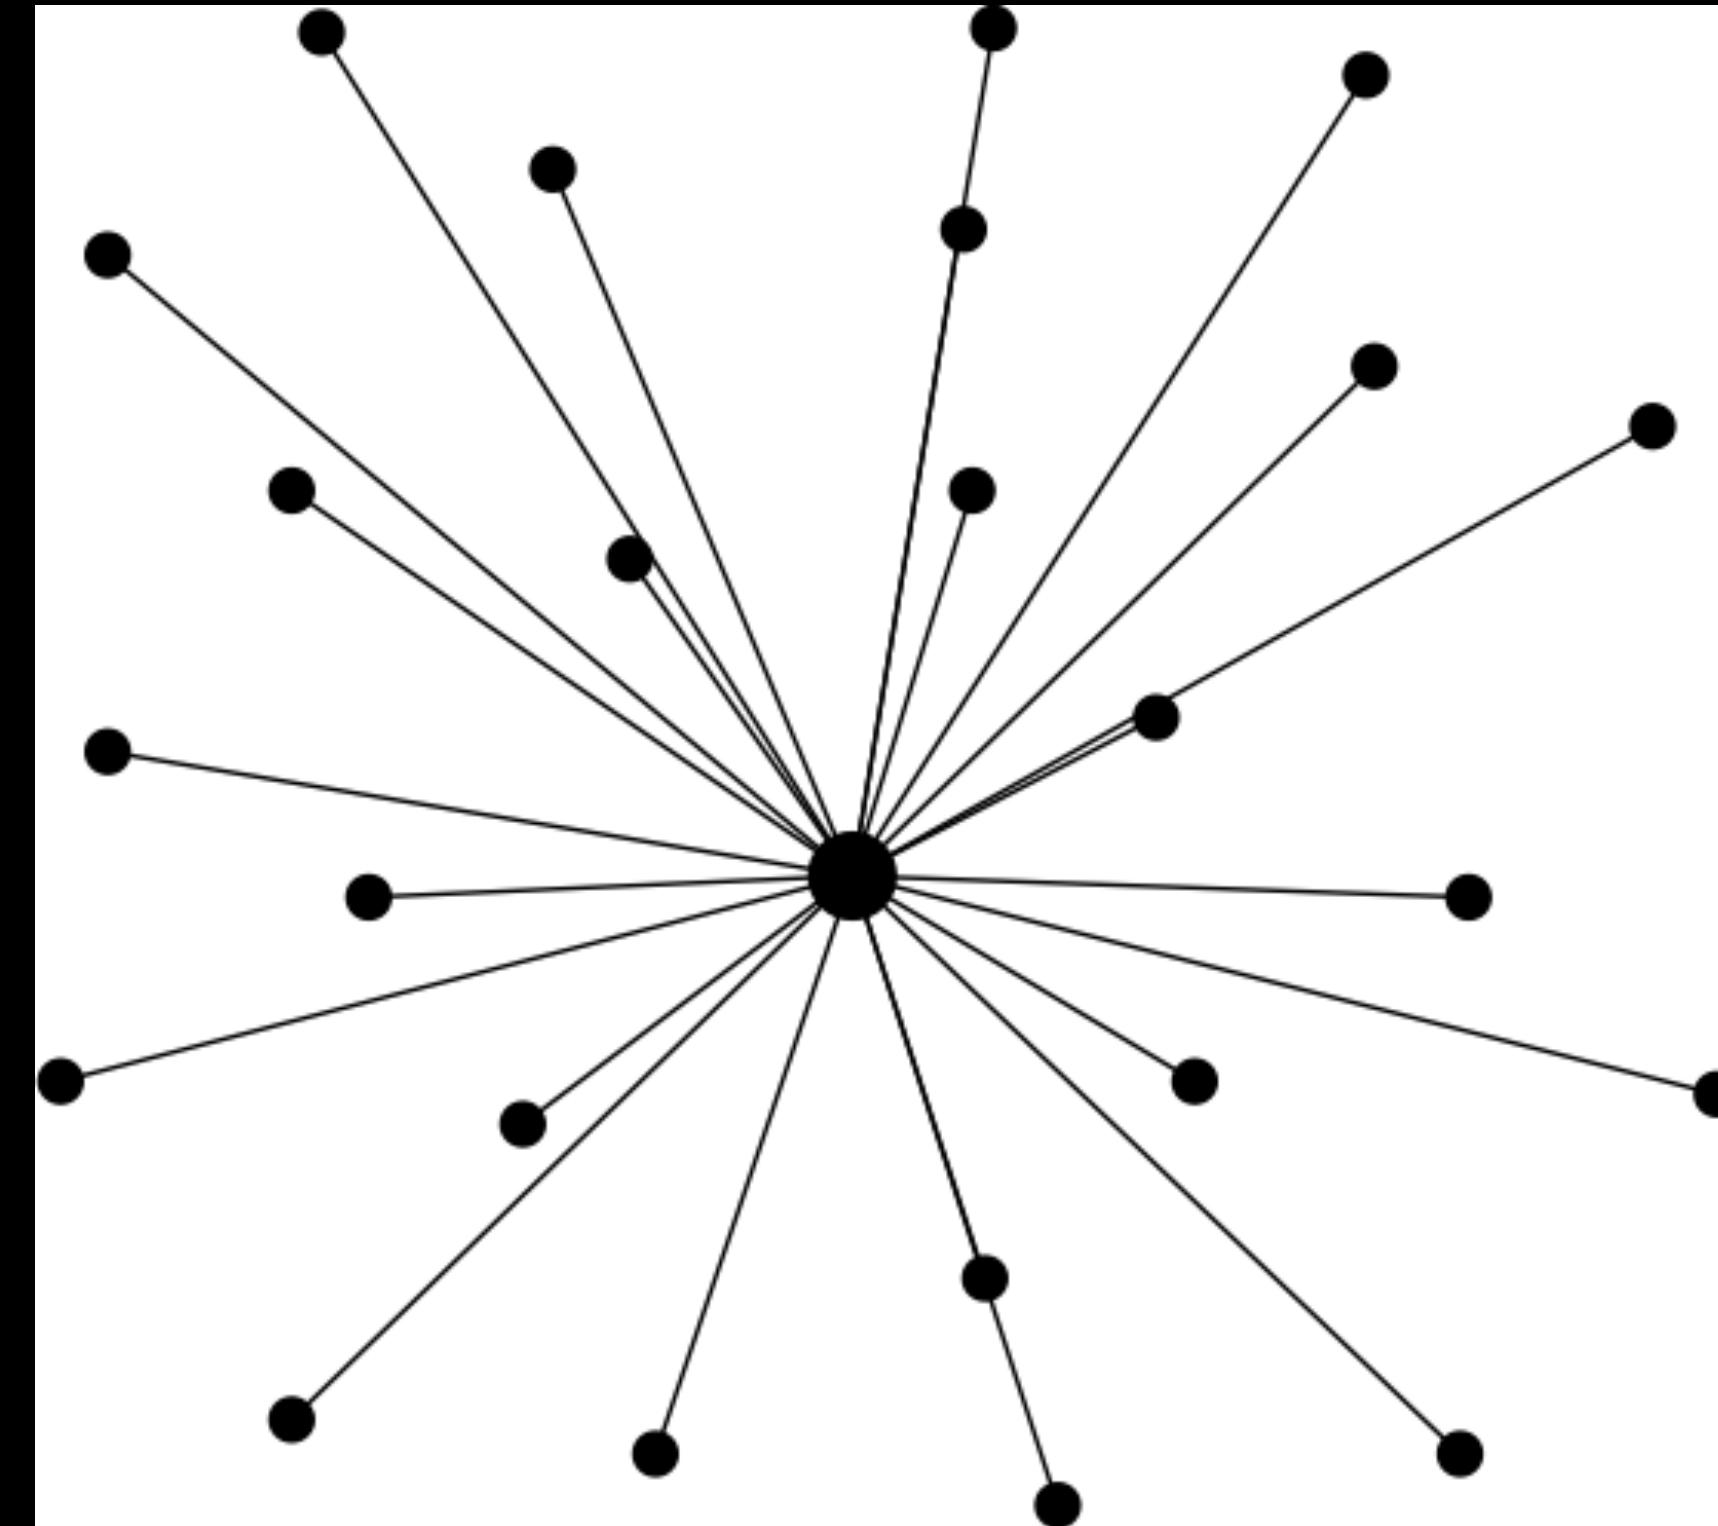

# Connecting unconnected nodes

There are many ways to connect the dots in this picture

# Simplest way: star/ centralized connection

- Centralized connection was the easiest way to connect the nodes
- Very much susceptible to network link failures
- Links should stay connected during the connection

# The old Stockholm telephone tower in 1890

# Fallen telephone lines by frost at Jönköping, Sweden, 1929

# Tekniska museet in Stockholm (June 2018)
